**Let's Start!****Installing Pug- Ins in Your Browser****Learning Outcome:**

Understand key information about the concepts, principles, and methodologies in simple spoken and written situations.
Talk about programming techniques, use cases, kinds, and sequences in simple spoken and written situations.

Can Do Statements:

- I can explain what a plug-in is.
- I can understand why plug-ins are required.
- I can identify information and concepts related to plug - ins.

Ask your partner:

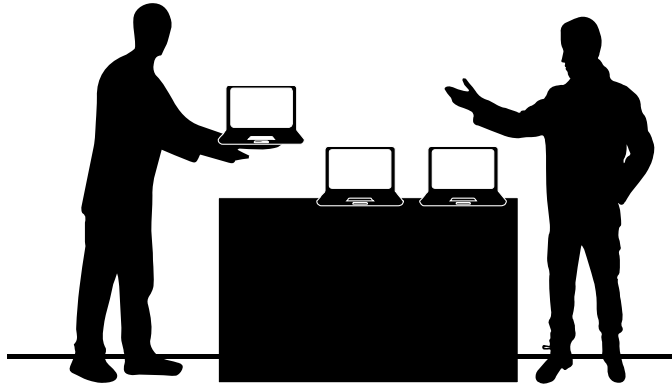

- What features can you find in a web browser?
- In your opinion, how can we improve the performance of a web browser?

Let's Explore!

My web browser doesn't perform properly.

Instructions: Read the text below.

Customer: Hello!

Representative: Hi, Why are you here today? How may I help you?

Customer: I had a problem yesterday when I got home and tried to use my new computer, whenever I opened the web browser, tons of advertisement appeared and it made the computer kind of slow. I would like to avoid that situation from happening again.

Representative: Hmm, tell me, did you install any advertisement blocker plug-in?

Customer: a What?

Representative: A Plug-in, ma'am.

Customer: No I didn't. Was it included in the computer box?

Representative: No, it wasn't, because a plug-in is not a physical object.

Customer: Then, what are they?

Representative: Well, many computer applications, like web browsers, let third party developers write little programs that add different functions to them. their name comes from the way they connect to the main program.

Customer: Why are they so important? Do they have any special function?

Representative: There are some plug-ins that let users personalize their accounts on some social networks; increasing the number of potential users, and for your particular case, there are plug-ins that work as filters blocking advertisement from any web page.

Customer: Tell me more about those Plug-ins, please.

Representative: Sure! Did you know some plug-ins are essential if you want? Well, depending on the kind of web page you want to have, you can choose different plug-ins to add some specific features to your website. Maybe you didn't notice but you use plug-ins all time, one of the most common allows the browser application to run Java applets.

Customer: Well, I didn't install a blocking plug-in, so that's why my computer was really slowly. I got it, I will install the advertisement blocking plug-in as soon as I get home. And maybe I will check for other plug-ins that can be useful for me.

Representative: Was the information useful to you ?

Customer: Totally, thank you so much.

Representative: You're very welcome.

Let's Practice!

The customer has some questions about the definition of plug-in.

Instructions: Proofread the sentences. Correct the mistakes.

1. Who are plug-ins? They are little programs that add different functions to many computer applications.

2. What do you think plug-ins are important? Because they have many functionalities, you can choose different plug-ins to add specific features to a website.

3. When kind of plug-ins do you know? Well, I know some plug-ins that let users personalize their accounts; and there are also some that work as filters, blocking advertisement.

Let's Practice!

I think plug-ins are really useful.

Instructions: Read the paragraph and select all the correct answers.

Plug-ins are essential as they allow you to add some specific features to your websites. Besides, they come in handy when personalizing some social networks. They also work as filters because, for instance, they block unwanted publicity.

Why are plug – ins are necessary?

1. ____ I consider that software includes programs and apps.
2. ____ Because you choose different plug-ins to add some specific features to your website.
3. ____ From my experience, many computer applications work better in real time.
4. ____ Because they help you to personalize some social networks.
5. ____ They are necessary because they work as filters.

Extension Activity

Creating a Brochure about Plug-ins

e.g. Did you install any advertisement blocker plug-in?
- **essential** (adjective): something that is really important
e.g. Did you know some plug-ins are essential if you want?

Learning Points

Simple past: Auxiliary Be vs Auxiliary Did in Questions and Negative

You use the **simple past** to talk about finished actions in the past. Let's see how to use verb to **be** and the auxiliary **did** in the interrogative and negative forms. Let's check how both **did** and **to be** works in past to express question and negative sentences.

Verb to Be in Simple Past

Questions

To ask about past events or actions in close questions follow this structure:

Was/Were + subject + complement + ?

Examples:

Was the computer on?

Were you concerned about the issue?

Negative

To make negative statements about past use:

Subject + **was/were** + **not** + complement.

Examples:

The plug-in **was not** installed.

They **were not** sure about the reason of the problem.

*Contractions

Was not = wasn't

We're not = weren't

Auxiliary Verb Did

In order to make close questions with verbs that are different from the verb to be follow this structure:

Questions

Did + subject + verb in base form + complement?

Examples:

Did you use any plug-in?

Learning Points

Negative:

Subject + **did + not** + verb in base form + complement

Examples

*I **did not** understand what a plug-in is.*

**Contraction

Did + not = didn't

Remember if you want to ask about specific information you should add a Wh question word at the beginning of the questions.

Examples

- *Did you know some plug-ins are essential if you want?*
- *Did you installed any advertisement blocker plug-in?*

Learning Points

Wh Questions

When you use **WH-questions**, you ask for specific information; so we cannot answer this kind of questions using yes or not, but giving specific details.

Wh-Questions Structure

You create WH-questions adding a WH-word or interrogative adverb to the structure of a question.

Wh-Word + auxiliary verb + subject + main verb + complement +?

Look at the following chart to check the most common interrogative adverbs:

Wh-Word	Purpose
What	Chooses something within a variety of things.
Why	Asks for a reason.
Where	Asks for a place.
When	Asks for a specific moment.
Who	Asks for a specific someone
How	Asks for the way in which something happens.
Which	Asks to choose something within a limited number of options.

Examples

- *How can I help you today?*
- *What kind of functions?*

Learning Points

Popular Plug-Ins to Build Your Own Web Page

Plug-ins are small programs that can widen the features of other programs that are commonly bigger. The most common examples are the web browsers and their extension.

The following chart shows 10 plug-ins:

Plug-ins	Functionality
Wordfence Security	Provides security to your website
WP-PageNavi	Adds a more advanced page navigation experience
Disable Comments	Disables the comments section easily
WP Smush - Image Optimization	It allows you to reduce the size of images while improving page performance
TablePress	Adds tables and charts to you page
WP Maintenance Mode	It allows visitors know your site is down for maintenance.
bbPress	It gives you the opportunity to create a forum.
Gallery	Adds a photo gallery to your page.
Easy Google Fonts	Add Google fonts easy and without codex.
